

# Referral Rewards Program

Successful inventory-sharing relies on “critical mass” participation. A proven method of achieving higher levels of participation is by referrals from existing WarehouseTWO members.

If you are reading this document, then you probably think that you can influence peer distributors and your manufacturers to join WarehouseTWO. All it takes is a little effort. With this program, we will reward you for the results of your efforts.

We offer these three incentives to refer others to participate at WarehouseTWO:

**Edible Treat:** Whenever another distributor enters your name or company in the “referred by” field during the registration of its premium-level (Level 2 or higher) account, we will send to your office some edible treats to share with co-workers.

**Six Months' WarehouseTWO Membership Fee Waived:** If, during any contiguous six month period, at least five distributors enter your name or company in the “referred by” field during the registration of their premium-level (Level 2 or higher) accounts, we will waive your company’s membership fees (at any level) for six months. (This is a once-per-company reward.)

**Six Months' WarehouseTWO Membership Fee Waived:** Whenever a manufacturer enters your name or company in the “referred by” field during the registration of its community-hosting (Level 5) account, we will waive your company’s membership fees (at any level) for six months.

[Click here](#) for suggestions on how to introduce WarehouseTWO to peer distributors and to your manufacturers.

Getting another distributor to join WarehouseTWO can be as easy as making a phone call or sending out an introductory email. To help with the content of an introductory email, we offer two email templates:

- [introductory email](#), to be used in a single email campaign, or to be used at the beginning of a campaign of monthly emails
- [monthly email](#), to be used as part of a monthly email campaign targeting peer distributors; each month this link will point to a new email template that has a unique topic related to inventory-sharing

Instructions are included with each template.

Thank you for supporting WarehouseTWO.
